Paper Title

Edge-Resilient Architecture for Smart Agriculture: Performance Evaluation of ESP-NOW and AES256 in Intermittent Connectivity Scenarios

Reviewer #2

Questions**1. Relevance to the field**

4

2. Research Methodology

4

3. Originality and Innovation

3

4. Quality of Data and Analysis

4

5. Clarity and Coherence

4

6. Literature Review

4

7. Significance and Impact

4

8. Ethical Considerations

4

9. Practical Implications

4

10. Recommendations for Improvement/ Overall Comment

This is a good research paper with strong experimental validation needs a kind of improvements in novelty positioning, security depth, and formatting

11. Overall Evaluation
